YES

Health Master Global applications was created not only to gather and monitor your Health data with scientific standards but also to aid with your personal social needs.

It is one of the many pieces of the periphery to center approach that, Hakan HAMZAÇEBİ, M.D. has adopted to raise the world health system's spine and provide equal, scientific, common and transparent health services to all.

Which features can I benefit from while using the HMG applications for free ? (1)

With the integrated [Step&Speed Trainer](#) application, as a first in the world, you can monitor and share your walking speed simultaneously without using GPS.

With this application that doesn't drain your battery life you can plan indoor (including body building) and outdoor exercises and speed training.

You can view daily, weekly, monthly and yearly speed training performances interactively with this application that saves it as graphs and sets reminders for exercises. In addition to this, you can use your daily energy spent and performance criteria (PAL, Menu recommendation etc.) in other manage your health applications as desired.

With the integrated [Appointment](#) application you can manage personal (special dates, meetings with friends, bank etc.) and set reminders.

With [Health Message](#) (our messaging application with WhatsApp + Word + Translator + video call functionalities) you can message your friends/health professionals securely, send and receive messages in your desired font, punto, color etc. and translated into your desired language.

Your documents and interactive graphics created in the application can easily be shared.

With the [Health Editor](#) you can store your health examination results, medical documents, diseases, vaccination, allergy, intolerance drug and side effects etc. information chronologically and categorized.

In addition to instant translation and editing, you can search using keywords. By attaching the graphics created by the Interactive Health application to related documents with ease it allows for scientific evaluation of health data. Valuable information such as passwords can also be stored and secured.

With the [interactive health](#) application you can input your daily weight, waist/hip circumference, fat, visceral fat, mass, etc. values manually on graphics.

With these graphics created projectively on a timeline with your exercise date you can monitor your performance more scientifically.

Which features can I benefit from while using the HMG applications for free ? (2)

When results of tests performed by network associate laboratories are available they are automatically saved to the application for you to view as interactive graphs, monitor with other anthropometric parameters or share with your desired health professional. There is no need for you to manually input your test results.

You can view the addresses, directions, specialties of network associate health professionals and health organizations filtered by name, location, etc.

You can view the selected health professional or organizations working principles, unique discounts and special offers and get directly in touch with them via Health Message.

In addition to this you can view laboratories that offer home pick-up of samples for blood, urine tests, organizations that offer transportation services, pharmacies that provide discounts and locations etc.

By tapping the PROMOTION icon on the WEB/Mobile applications you can view unique promotions by companies (electronics, health, food/drinks, sports, etc.) that wish to reward your exercise efforts with discounts (valid for 24 hours and increasing with your step count) for purchases on their websites

By tapping the BONUS icon on the WEB/Mobile applications you can view food/drink items with equal energy value as your excess energy spent during exercise and reward yourself.

If desired, you can also plan/calculate exercises to eat/drink more.
